• Consider the reaction $2SO_2(g) + O_2(g) \rightleftharpoons 2SO_3(g)$ $\Delta H^\circ = -198.4 \text{ kJ mol}^{-1} \text{ and } \Delta S^\circ = -187.9 \text{ J K}^{-1} \text{ mol}^{-1} \text{ at } 25 \text{ °C.}$ Show that this reaction is spontaneous at 25 °C.	Marks 5
If the volume of the reaction system is increased at 25 °C, in which direction will the reaction move?	_
Calculate the value of the equilibrium constant, $K$ , at 25 °C.	_
K =	-
Assuming $\Delta H^{\circ}$ and $\Delta S^{\circ}$ are independent of temperature, in which temperature range is the reaction non-spontaneous?	
Answer:	1
